About this Guide

The eScreen Electronic Medical Service Status and Results service describes the implementation of electronic status and reporting for vendors and clients whose personnel are having Occupational Health services performed at U.S. clinics affiliated with eScreen's network of clinics and national account clients.

This guide is intended for eScreen integration partners who are implementing this service to receive electronic status and reporting of occupational health information from eScreen.

This document describes the technical details for available status and reporting methods, provides node definitions, explains status and result values and outlines the XML standard. Detailed discussions with eScreen technical staff may be required to implement these methods.

Delivery Details

The eScreen Medical Service Status and Results service can deliver electronic statuses and results, batch or near real-time, via the following methods with the noted security protocols.

Method	Description	Security Protocol
HTTP	HTTP delivery is currently provided by using XML push technology. The content type of the HTTP post is text/xml. A standard set of responses from the integration partner has been developed to facilitate pseudo-transactional delivery. These responses are required when implementing this delivery method.	SSL Required

Note: eScreen technical staff can provide code samples and assistance as required for building receiver components.

eScreen asks that clients and vendors confirm data has been received to indicate the transmission was successful. Below are Data that should not be validated at this time.

Response	Description
<eScreenData TransmissionID='xxx' status='S'/>	Successful receipt of transmission. NOTE: xxx is the actual TransmissionID in the Source XML.
<eScreenData TransmissionID='xxx' status='F'/>	Failed receipt of transmission. NOTE: xxx is the actual TransmissionID in the Source XML.

If no successful response is received after up to 30 seconds, eScreen will retransmit two more times before a failed notice is reported and the matter is escalated.

Node Definitions

Top Level	Description	Included/ Not Included	Type
TransmissionID		Included	GUID
RecordCount	Real time delivery always has a RecordCount of 1 Batch delivery can have a RecordCount of >1	Included	String
Version	The version of the integration used by the client	Included	String
DateReported	Date this result file was reported; MM/DD/YYYY	Included	String
TimeReported	Time this result file was reported; HH:MM:SS	Included	String
PhysicalResult	See table 1.1 below	Included	

1.1 PhysicalResult

Node	Description	Included/ Not Included	Type
OverallStatusCode	Status of the overall event; communicates where the event is in the process; See table 1.2 below	Included	Integer
OverallStatusDescription	Plain text description of OverallStatusCode	Included	String
PhysicalID	An eScreen ID for the overall event the service(s) were scheduled under	Included	String
ConfirmationNumber	Confirmation Number for scheduled event	Included if available	String
eScreenClientAccount	ClientAccount as stored in eScreen system	Included	Integer
eScreenClientSubAccount	ClientSubAccount as stored in eScreen system	Included	Integer
InternalClientID	Your internal Client ID as provided to eScreen during client setup	Included if available	String
ElectronicClientID	Partner Customer ID as stored in Partner system and eScreen system; This is a unique number across all accounts	Included	String
ClinicName	Clinic Name	Included	String

Node	Description	Included/ Not Included	Type
ClinicAddress1	Clinic Address	Included	String
ClinicAddress2	Clinic Address	Included if available	String
ClinicCity	Clinic City	Included	String
ClinicState	Clinic State	Included	String
ClinicZip	Clinic Zip	Included	String
CollectionSitePhoneNumber	Phone number of Collection Site	Included if available	String
ClientName	Client company name	Included	String
ClientContact	Contact for the company	Included	String
ClientAddress1	Address for company	Included	String
ClientAddress2	Address for the company	Included if available	String
ClientCity	City for the company	Included	String
ClientState	State for the Company	Included	String
ClientZip	Zip for the Company	Included	String
FirstName	Participant's first name	Included	String
LastName	Participant's last name	Included	String
BirthDate	Participant's Date of Birth	Included if available	Date Time
ExamDate	Date the service was performed	Included	Date Time
PhysicalReasonID	Code for the reason for the service(s); See Appendix	Included	String
PhysicalReasonDescription	Plain text label for the reason for the service(s)	Included	String
ExamTypes	See table 1.1.1. below	Included	

Node	Description	Included/ Not Included	Type
SSN	Participant's social security number	Included if available	String
DLNumber	Participant Driver's License number	Included if available	String
DLClass	Class of Driver's License	Included if available	String
DLStateCode	State of Driver's License	Included if available	String
NRCMENumber	10-digit National Registry certification number from the DOT	Included	String
IntrastateFlag	Intrastate Designation	Included if available	String
CDLFlag	Commercial Driver's License Designation	Included if available	String
OtherID	Other ID provided by participant; See table 1.4 below	Included if available	String
OtherIDType	Any other ID type presented during the physical	Included if available	String
ExternalDonorID	Unique ID provided by Partner to identify donor.	Included if available	String
AdditionalNotes	Any additional information on the physicals (can be a medical condition that requires monitoring)	Included if available	String
Network	In or out of Network for billing purposes	Included	String
CostCenter	Client's cost center / job code	Included if available	String

1.1.1 Exam Types

Node	Description	Included/ Not Included	Type
ExamType	See table 1.1.1.1 below	Included	

1.1.1.1 ExamType

Node	Description	Included/ Not Included	Type
ComponentId	IDs associated with occupational health services; Additional documentation will be provided based on your organization's integration with eScreen; See table 1.6 below	Included	Integer
ComponentDescription	Description of IDs associated with occupational health services; see Appendix	Included	String
ServiceIdentifier	IDs associated with occupational health services; Additional documentation will be provided based on your organization's integration with eScreen; See table 1.6 below	Included	String
Status	Status to communicate where event is in the process; See table 1.7 below	Included	String
StatusChanged	Informs the client that the status of the exam has been updated	Included	Boolean
PartialReasons	Communicates the information received from clinic when event is still incomplete	Included	String
CertStatusCode	Pending and final status codes that communicate terms and stipulations of the certification for the service; See table 1.3 below	Included	String
CertStatusDescription	Plain text description of CertStatusCode	Included	String
CertStatusCodeDueToReason	The reason CertStatusCode 3, 4 or 10 was selected as a final status; no other CertStatusCode requires a Due To Reason	Included if CertStatusCode 3, 4 or 10 selected	String

FollowUpDate	Re-examination date for anyone with a Temporary Fail result	Included if available	Date Time
CertExpirationDate	Date the physical certificate expires for DOT physicals	Included if available	Date Time
TBReadDate	Date TB test was read	Included if available	Date Time

1.1.2 PartialReasons

Node	Description	Included/ Not Included	Type
PartialReason	See table 1.1.2.1 below	Included	

1.1.2.1 PartialReason

Node	Description	Included/ Not Included	Type
PartialReasonDescription	Text description of the current status of the component. Only provided if status of the component is Partial.	Included	

Appendix

1.2 Overall Status Values

Overall Statuses communicate the status of an entire event which can contain multiple OccHealth services (OHS).

OverallStatusCode	OverallStatusDescription
1	Scheduled
2	Pending Fax
3	Complete
4	No Show
5	Canceled
8	Partial

1.3 ExamType Status Values

ExamType Statuses communicate the status of individual OccHealth services within an event.

Status	Description
Scheduled	The OHS service has been scheduled.
Pending	Indicates the patient has checked into clinic. Can also indicate eScreen OHS team is awaiting paperwork to update result.
Partial	Service is partially complete & OHS team has partially completed paperwork from clinic. Status is accompanied with a 'Partial Reason'.
Pending Medical Review	Service is complete but requires further review by eScreen or Client Clinical Review team.
Complete	Indicates service has been given a result (CertStatusCode).
No Show	Status updated by OHS team after confirmation from clinic that the patient hasn't arrived.
Cancelled	OHS team confirms patient arrived at clinic, but services weren't completed.
Suspended	Non-DOT Physical, DOT Physical, or TB status has been suspended awaiting completion.

**** NOTE:** <StatusChanged> of 'True' indicates there has been an update to the ExamType status since most recent transmission. <StatusChanged> of 'False' indicates there hasn't been an update to the ExamType status since the most recent transmission

1.4 CertStatusCode Values

Cert Status Codes communicate dispositions related to the certification of an OccHealth service and overall OccHealth service result.

Value	Description
1	Meets standards in 49 CFR 391.41; qualifies for 2-year certificate
2	Does not meet standards
3	Meets standards, but periodic monitoring required due to:
4	Temporarily disqualified due to:
5	Able to perform this job without accommodations
6	Able to perform this job with accommodations noted below
7	Unable to perform this job
8	Medical determination deferred, pending further evaluation needed
9	No medical restrictions
10	Medical restrictions given
11	Does not meet requirements
12	Further evaluation needed
13	No Bill
14	Positive
15	Negative
16	Completed
17	Cancelled
18	No Show
19	Inconclusive
20	Requires Physician Review
21	Policy Violation
22	Pass
23	Fail
24	Meets Standards in 29 CFR 1910.134; may wear a respirator without restrictions
25	Meets Standards in 29 CFR 1910.134; may wear a respirator with restriction
26	Incomplete
27	Immune
28	Not immune
51	Meets standards in 49 CFR 391.41; qualifies for 1-year certificate
52	Fit for Duty
53	Meets Standards in 29 CFR 1910.134; may wear a respirator with restriction for 1 Year
54	Meets Standards 29CFR 1910.120 for one year
55	Meets Standards in 29CFR 1910.120 (2 year)
179	Correction Recommended – See Printed Comments
205	Meets standards in 49 CFR 391.41 (Federal); qualifies for 2-year certificate
206	Meets standards (Federal), but periodic monitoring required:
207	Meets standards in 49 CFR 391.41 (State) with any applicable State variances
208	Meets standards, (State) but periodic monitoring required due to:
210	Incomplete

Value	Description
211	Determination Pending **

**** NOTE:** “Determination Pending” is a final status, but an amended status could be transmitted up to 45 days after completion. Upon transmission of an amended status, it is required that the new status be made visible to the consuming entity by the trading partner.

1.5 OtherID Type Values

The eScreen system enables the user to indicate the type of participant ID submitted with the scheduled event. The Medical Service Status and Results Service presents the participant ID type within the Physical Result node.

Value	Description
D	Driver’s License
P	Passport
M	Military ID
E	Employer ID
O	Other
Empty (No value)	None

1.6 PhysicalReason Values (OccHealth Service, Reason For Test)

The eScreen system requires the Reason for Test to generate a scheduled event, thus the Medical Service Status and Results Service presents the reason for test for each service. These values will be returned in the PhysicalReasonID and PhysicalReasonDescription nodes respectively.

Value	Description
1	New Certification
2	Recertification
3	Follow-up
4	Other
5	Site Access
6	Pre-employment
7	Return to Duty
8	Surveillance

1.7 Occupational Health Values

The ComponentId/ServiceIdentifier indicates the type of service that was performed. In the table below are standard eScreen occupational health services. Please work with the Integration team to get a full list of occupational health services enabled on your account.

ComponentId	ServiceIdentifier	Description
1	1001	NDOT physical
2	1002	DOT physical
4	1004	Vision Test, Titmus
5	1005	OHSA Respirator Questionnaire
6	1006	Audiogram
8	1008	Kraus Weber Lower Back Evaluation
19	1019	TB/PPD Test 1
20	1020	TB/PPD Test 2
21	1021	TB Chest X-Ray
22	1022	Hep-B Vaccination- #1
23	1023	Hep-B Vaccination #2
24	1024	Hep-B Vaccination #3
38	1038	Varicella Vaccine #1
72	1072	Vision Test, Ishihara
77	1077	Tdap
79	1079	MMR Vaccine #1
82	1082	Influenza Vaccine
84	1084	Hepatitis A Vaccine
96	1096	Vision Test, Snellen
137	1137	Vision Test, Jaeger

1.8 Occupational Health Network Values

The Network value indicates the type of clinic in which the service was performed for billing purposes.

Value	Description
0	Contracted Out of Network
1	Contracted In Network Tier 1
2	Contracted In Network Tier 2
